

## Swindon Powertrain Monthly Newsletter

**Bosch Motorsport, Electronics & Wiring Loom Dept**

**February 2021**

### **General**

A warm welcome to February and another edition of the Swindon Powertrain company newsletter. Whilst the United Kingdom is still under national lockdown conditions, we are happy to announce that Swindon Powertrain continues to service the needs of its clients, so please do not hesitate to contact us via email or telephone to discuss your project with us.

### **Wiring Loom Dept**

The Wiring Loom Dept continues to be extremely busy on a multitude of automotive projects; both motorsport and OEM/Niche Vehicle Manufacturer orientated electronics & wiring loom work.

With the BTCC season due to start in May, the Wiring Loom Shop is also busy supporting the Swindon Powertrain BTCC TOCA engine build programme and whilst this is one of the busiest times of the year for everyone concerned with the TOCA engine project we are always very keen to discuss new projects.

Consequently, please do not hesitate to contact [pharris@swindonpowertrain.com](mailto:pharris@swindonpowertrain.com) to discuss your specific project needs and how Swindon Powertrain can assist you, where we specialise in one-off prototypes through to low-volume batch production.

## Bosch Motorsport

Whilst the advent of Brexit may have adversely affected many businesses up and down the country, we are happy to announce that we continue to operate an efficient service for the full range of Bosch Motorsport products.

Therefore, please do not hesitate to contact us to discuss your specific project requirements and we will expedite your Bosch Motorsport product orders and requests for Bosch technical support in an efficient manner to meet your specific project timelines.

## EB-01

The SWIND EB-01 continues to be an extremely popular leisure product amongst extreme thrill seekers around the globe and whilst we are unfortunately not able to offer test rides on the SWIND EB-01 here in the UK currently, we hope to be able to offer this facility again in the very near future.

The SWIND EB-01 is a custom, hand-built electric mountain bike which is built to the customer's exacting specification. We only make the EB-01 to order, so how would you configure yours?

Please do not hesitate to contact Peter directly ([pharris@swindonpowertrain.com](mailto:pharris@swindonpowertrain.com)), should you wish to book a future test ride on the world's most powerful electric mountain bike.
